###############################################################

EAP sources are present...

  - creating the target directory...

Unpacking new JBoss Enterprise EAP 6...

Unpacking JBoss BPM Suite 6.0.0.GA...

  - enabling demo accounts logins in application-users.properties file...

  - enabling demo accounts role setup in application-roles.properties file...

  - setting up standalone.xml configuration adjustments...

  - making sure standalone.sh for server is executable...

  - setting up demo projects...

Deploying web service that pulls out credit report of customer based on SSN...

You can now start the JBoss BPM Suite with ./target/jboss-eap-6.1/bin/standalone.sh

PRE-LOAD MORTGAGE DEMO
======================
To load the BPM with a set of process instances, you can run the following command
after you start JBoss BPM Suite, build and deploy the mortgage project, then you can
use the helper jar file found in the support directory as follows:

    java -jar jboss-mortgage-demo-client.jar erics bpmsuite

JBoss BPM Suite 6.0.0.GA Mortgage Demo Setup Complete.
```
